

K2 Australian Fund

31 May 2022

The K2 Australian Fund is an Absolute Return equities fund. The fund is index-unaware, aiming to produce positive absolute returns over the long term with a capital preservation mindset. The Fund's mandate allows it to actively manage its net market exposure – utilising both cash and shorts to help protect clients' capital.

Commentary

The K2 Australian Fund returned -3.68% for the month.

During the month a number of central banks lifted their official cash rate. Most central bankers appear to be placing significant weight on survey results that amplify the difficulties in finding labour. However, to our mind, the tightness in labour markets could be on the verge of becoming a lagging indicator; the persistent poor performance of share prices, the contraction in business confidence and the flattening yield curve is probably suggesting that job openings could be on the cusp of a meaningful down turn. By way of example, over the past six months, the value of the average US listed software company has declined by 30%. Given this dramatic move, it is reasonable to assume that the demand for software engineers should taper. This is why central bankers closely monitor financial conditions; sharp downward moves in asset prices can allow central banks to be less hawkish in their application of monetary policy.

Earlier this year, the RBA indicated that Australia has had an advantageous inflationary bearing thanks to multi-year enterprise wage agreements, a strong corporate cost culture and a more balanced supply of domestic energy. However, it would appear that the RBA's business liaison program has identified a softening in the cost culture. In addition, energy supply constraints have led to elevated wholesale electricity and gas prices. As a result, inflation is emerging quicker than the RBA expected. Coincidentally, the Australian Labour Party (ALP) won the recent election. The ALP campaign was focussed on climate action, real wages and employment opportunities. The ALP believes that a 5% increase in the minimum wage is needed and that renewable energy can create jobs, reduced emissions and provide a cheaper source of power. It will be interesting to see how the Reserve Bank of Australia (RBA) interprets the ALP's strategies.

The best performing holdings for the Fund this month were Mineral Resources (MIN) and BHP Group (BHP) which rose 9% and 4% respectively. MIN's mining services, lithium and iron ore businesses are leveraged to actions to stimulate China's economy. BHP spun out its petroleum assets via a transaction involving Woodside Petroleum (WPL) whereby BHP shareholders received 1 new share in Woodside Energy Group (WDS) for every 5.534 BHP shares that they owned. Macquarie Group (MQG) was the largest detractor for the month declining 10%; the 56% improvement in its annual profit this year did little to offset the risk-off mentality of market participants.

Top 5 Stock Holdings	Current	Monthly Move
Macquarie Group Ltd	9.5%	-0.6%
BHP Group Ltd	7.6%	-0.2%
RIO Tinto Ltd	6.7%	+0.4%
