

K2 Global High Alpha Fund

31 August 2019

The K2 Global High Alpha Fund is an Absolute Return equities fund. The fund is index-unaware, aiming to produce positive absolute returns over the long term with a capital preservation mindset. The Fund's mandate allows it to actively manage its net market exposure – utilising both cash and shorts to help protect clients' capital.

Growth of \$10,000

Commentary

The K2 Global High Alpha Fund returned -3.5% for the month of August.

Global equity markets were extremely volatile during the month as once again President Trump further intensified the disruptive and ongoing trade war with China. Weak manufacturing data also contributed to the further compression of long bond yields, resulting in the US 10-year yield falling below the US 2-year yield. This historically has been a reliable recession indicator however given the manipulation of bond yields by global Central Banks this indicator is unlikely to be as predictable as it once was. The MSCI AC World TR Net AUD Index fell -0.1%, aided by the weaker AUD. Commodities tumbled with Iron Ore and Oil falling -28% and -6.7% respectively. Perceived safe haven assets performed best with Gold up +6.7% and the USD currency index breaking out to fresh 12 month highs, up +0.4% to 98.92. The great bond rally continues. The US 10-year bond yield capitulated 52bp in August to below 1.5%. Currently over USD17 trillion is invested in negative yielding bonds globally, representing approximately 30% of all investment grade securities.

The main positive contributor to performance included a position in small cap Australian niche property focused fund and asset manager Elanor Group. The stock rallied over 25% following a strong FY19 result. The key highlight being the 28% growth in FUM, demonstrating a sustainable rise in recurring income. Elanor continues to deliver on its key strategic initiatives and is well funded to support future investments. Other strong performers included Taiwanese semiconductor company MediaTek (+17%), US food processor Tyson Foods (+17%) and a short position in ride-sharing business UBER (-23%).

The AUD ended the month down -2.2% versus the USD. The Fund is currently 95% hedged to the AUD, providing capital protection against a falling USD. We believe the USD will ultimately decline on lower interest rates and any positive related trade outcome between the US and China. Net exposure increased by 7.1% during the month to 83%.

Top 5 Stock Holdings	Current	Monthly Move
